

SOLDER CREAM MIXER

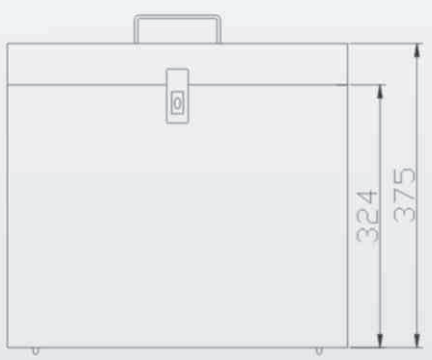

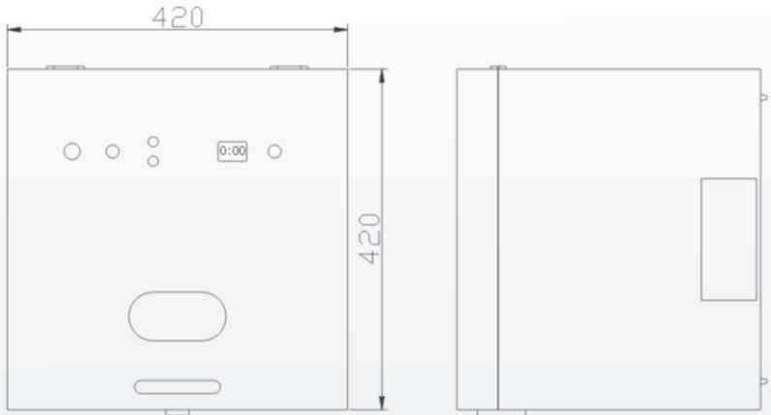

MIX500D

APPLICATION

MIX500 Solder Cream Mixer can efficiently and evenly mix the metal powder with the liquids so as to achieve more perfect effects of printing and reflow soldering, save the working time and make the operation more standardized. The machine can also reduce the opportunities of absorbing the moisture from the air as the user doesn't need to remove the lid of the solder paste can.

Before mixing

After mixing

FEATURE

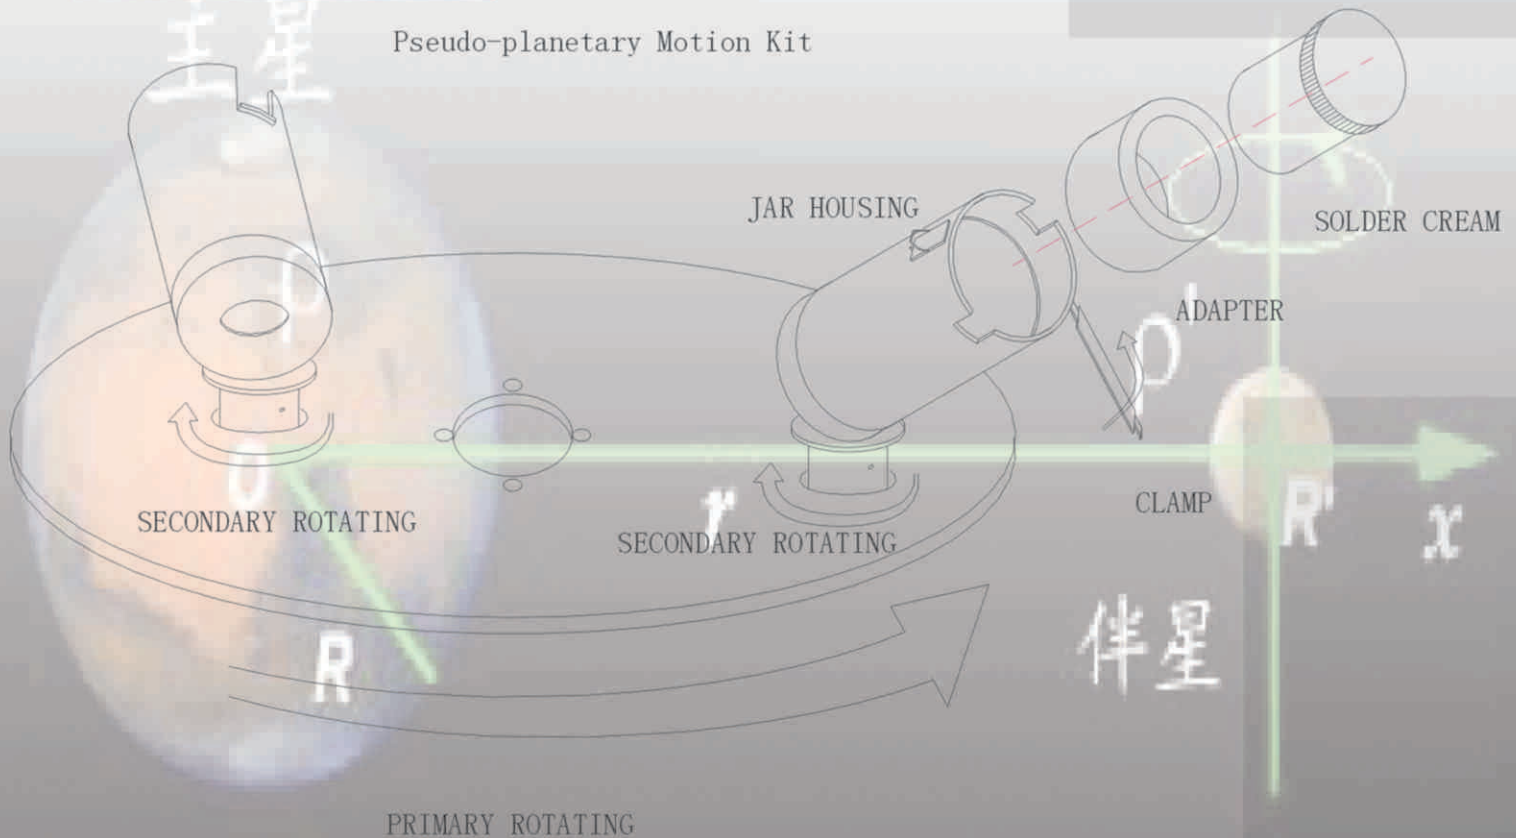

- Three-level safety design: The lock, proximity switch and the electromagnet valve can assure the safety for the physic body.
- The only maintenance work the user needs to do is cleaning; and it works steadily with low noise.
- With LED, indicators and buzzer for warning, it is easy to operate.

SPECIFICATION

- Power: AC 220 V 50hz ; 60 W
- Rotating speed:
Primary Rotating: 400 RPM
Secondary Rotating :105 RPM
- With the adapter: 500g × 2cans, 1Kg × 2cans
- Time setting: 0.1 ~ 9.9Mins
10 ~ 30Mins
- Dimension: 420 × 420 × 395mm W × D × H
- Weight: 33Kg

HIGHLIGHT

Pseudo-planetary Motion Kit

The composition of solder paste in the can will be evener and it will be easier to handle the can if the can is tilted.
